

# Maarten QA

? What was the overall vision for the project?

Was it to be FOSS? To replace / complement / consolidate / expand MS tooling?

The tool can be released as open source.

? What was the main goal?

He wants a compiler. To expand the compile time expressions.

? What are your grievances with the current situation?

You get no issues, but a random error message.

## General Q/A

? Was there any form of metric that you had in mind?

? Which errors are most critical?

Unknown / To be determined

? What was expected of the scope? Just syntax? security? other?

syntax

? How was it expected to integrate into the workflow? Why was VSCode specifically mentioned?

Could also end up (partly) being a git hook?

It is the main tool used at Info Support. However, the tool should work regardless of IDE.

? More specific IDE's that the focus would be on. VS / VS Code, perhaps others?

No
